

Important Notes

- Number of Working Days: 6 days a week

Internship Duration: 6 Months.

Stipend: 10,000- 15,000.

Interview Process: Offline Process: Technical Round 1, Managerial Round

Candidates should possess strong Python coding skills and a solid understanding of Generative AI, RAG, and LLM.

Prior experience with AI projects is preferred.

Applicants must be willing to relocate to Hyderabad upon selection.

The interview process includes both online and offline rounds.

The first round will be an offline Technical Interview conducted at our Hyderabad office. The final round will be an online client interview, which will include a live coding challenge.

During the offline interview, candidates will be assessed based on their project work and learning attitude. This is an immediate joining requirement; therefore, only candidates available to attend the offline process and join immediately should apply.

This is an internship opportunity, and based on performance, a Pre-Placement Offer (PPO) may be extended to shortlisted candidates.

This opportunity is open to candidates graduating in 2025 and 2026.

Candidates from any educational background are encouraged to apply.

Candidates should have good communication skills.
