CAREER OBJECTIVE

Aspiring AI Engineer with hands-on experience in Python, Machine Learning, Generative AI, and intelligent application development. Skilled in building AI-powered systems using NLP, LangChain, and modern AI tools. Passionate about developing scalable GenAI and RAG-based applications.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Python Libraries: NumPy, Pandas, OpenCV, Scikit-learn, TensorFlow

AI/ML: Generative AI, LLMs, LangChain, RAG, Machine Learning, NLP

Web Technologies: HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Django

Databases: MongoDB, SQL

AI Tools: OpenAI API, Gemini API, Prompt Engineering

Deployment & Tools: Git, GitHub, VS Code, Vercel, Render

Problem Solving: Data Structures & Algorithms (DSA)

PROJECTS

AI-Based Ticketing System (Python)

- Developed an AI-powered ticket classification system using Python and machine learning
- Implemented automated issue categorization and priority prediction models
- Designed analytics dashboard for monitoring ticket trends and workflow efficiency
- Applied NLP techniques for intelligent text processing and classification
- Improved support workflow automation and response efficiency

Live Demo: <https://ai-ticketing-frontend-5nvr.vercel.app/>

AI PDF Chatbot using RAG (Python, LangChain, LLM)

- Built an AI-powered chatbot capable of answering questions from uploaded PDF documents
- Implemented Retrieval-Augmented Generation (RAG) using LangChain and vector databases
- Used embedding models for semantic search and context-aware responses
- Integrated LLM APIs for intelligent conversational responses

Facial Recognition System for Criminal Detection (Python, OpenCV)

- Developed a real-time facial recognition system using Python and OpenCV
- Implemented image preprocessing and feature extraction techniques
- Improved detection accuracy using optimized datasets and recognition algorithms
- Built an automated monitoring workflow for identity detection

Robotic Bomb Detection System (IoT Project)

- Developed a robotic system for detecting hazardous objects using sensors and microcontroller
- Implemented control logic using Arduino for real-time monitoring and navigation
- Integrated hardware and software components for remote operation
- Demonstrated problem-solving in safety-critical environments

INTERNSHIP EXPERIENCE

Web Development Intern – Genz Educating Wing

(Nov 2024 – Jan 2025)

- Developed responsive web applications including portfolio and real-estate platforms
- Collaborated with team members on UI/UX optimization
- Improved website responsiveness and frontend performance
- Worked with modern web technologies and deployment workflows

EDUCATION

B.Tech – Electronics and Communication Engineering

Sree Chaitanya College of Engineering (2021–2025)

CGPA: 6.5

CERTIFICATIONS

- Programming Foundations with Python – NxtWave
- Introduction to Databases – NxtWave
- JavaScript Essentials – NxtWave
- Node.js – NxtWave
- Responsive Web Design – NxtWave
- Developer Foundations – NxtWave
- CCNA: Introduction to Networks
- CCNA: Switching, Routing & Wireless Essentials

SOFT SKILLS

- Communication
- Teamwork
- Problem Solving
- Time Management

LANGUAGES

English, Telugu, Hindi
